EXPERIENCE

Full Stack Student Developer

Sep. 2024 – Present

IT University of Copenhagen

Copenhagen, Denmark

- Developed and maintained Pycipedia, a knowledge sharing website for social workers
- Built **React.js** frontend and **Express.js** backend with SQLite database
- Implemented a custom Tiptap-based editor and a file storage solution for users to create and share materials
- **Containerized** and deployed application on a **self-hosted Linux server**
- Set up staging and production environments, **CI/CD** pipelines, SSL certificates and NGINX reverse proxy

Full Stack Developer & Quality Assurance Student Assistant

Nov. 2023 – Sep. 2024

OktoGRID

Copenhagen, Denmark

- Created dashboards with **React.ts** that visualizes real time health of on-field devices
- Developed, tested, and maintained **RESTful APIs** using **FastAPI** and Python-based CLI applications
- Built data crawlers to query data from **AWS S3** and **IoT Core** using Python's **Boto3** library
- Managed **AWS Infrastructure** and deployed applications with **AWS CDK**

Test Process Specialist

Nov. 2020 – Sep. 2023

Bosch

Miskolc, Hungary

- Developed **Python-based applications** to automate daily engineering duties
- Built **data pipelines** to gather data from manufacturing equipment
- Created **PowerBI dashboards** to present KPIs of engineering team

Manufacturing Intern

Apr. 2017 – Nov. 2020

Bosch

Miskolc, Hungary

- Extracted data from manufacturing reports using VBA Macros
- Created automatized PowerPoint presentations from extracted data for daily meetings

EDUCATION

IT University of Copenhagen

Copenhagen, Denmark

MSc in Software Design – Software Development Specialization

Aug. 2023 – June 2025

Thesis: Evaluating User Capacity of N-Tier Web Services via Latency and Throughput Analysis

University of Miskolc

Miskolc, Hungary

BSc in Electrical Engineering – Electronic Design and Manufacturing Specialization

Sep. 2016 – Jan 2020

PROJECTS

Portfolio | *React.ts, FastAPI, PostgreSQL, GraphQL, Linux, Docker, Digital Ocean, CI/CD*

- Developed a data crawler which queries the Github REST and GraphQL APIs
- Built a FastAPI backend that serves the data for the frontend from a PostgreSQL database
- Created a React TypeScript frontend using TailwindCSS and MantineUI
- Built custom GitHub Contribution chart component, with data from GitHub GraphQL API
- Implemented Conway's Game of Life and a Falling Sand Simulation in React using canvas
- Containerized and deployed the backend on Digital Ocean where a cronjob triggers the data crawler every hour

Full-Stack App | *React.ts, FastAPI, Express.js, PostgreSQL, JWT, Docker*

- Developed identical JWT-authenticated backends using different frameworks to compare development experience
- Built a minimalistic, yet elegant React TypeScript frontend

TECHNICAL SKILLS

Languages: Python, TypeScript, Go, C#, Java, HTML/CSS

Backend: FastAPI, Express.js, Go Standard Library, .NET, NestJS, Flask, Django

Frontend: React.js/ts, TailwindCSS, Tiptap, MantineUI

DevOps & Cloud: AWS, Digital Ocean, Docker, Terraform, GitHub Actions, Bitbucket Pipelines, Prometheus, Grafana

Tools & Other: Linux, Bash, Vim, Git, Vagrant, Pytest, Jest
