Søndre Fasanvej, 54A, 2000, Frederiksberg

Profile

I am an **authentic** and **quick-witted Software Developer** with a background as an **Electrical Engineer**. I write my code in a **clean, testable** and **maintainable** way, with a keen **attention to detail**, and a dedication to quality. I am experienced in **problem solving within high pressure environments** and have the ability to **swiftly make well-informed, rational decisions**. I am **persistent** yet **reasonable**, and I work well both in a team and by myself.

Work Experience

Oct 2024 –

Student Developer

IT University of Copenhagen, Copenhagen, Denmark

- **Full Stack Development**

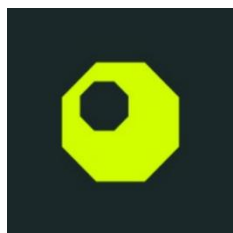

- *Developing React JS Frontend and Express JS Backend*
- *Taking over legacy codebase*
- *Maintaining and expanding application*

- **DevOps**

- *Containerizing and deploying application on ITU-managed servers*
- *Setting up Development, Staging and Production environments*
- *Configuring NGINX reverse proxy and SSL certificates for environments*

Nov 2023 – Oct 2024

Backend Developer & Quality Assurance Student Assistant

Oktogrid, Copenhagen, Denmark

- **Software Engineering**

- *Developing, testing, and maintaining RESTful APIs using Python FastAPI*
- *Creating CI/CD pipelines via Bitbucket for automated deployment*
- *Creating data visualization dashboards with React TS*
- *Developing, testing, and maintaining Python-based CLI applications*

- **Cloud Engineering (Amazon Web Services)**

- *Lambda: Managing Lambda functions responsible for processing and storing MQTT messages on S3*
- *IoT Core: Managing rules for MQTT messages to trigger Lambda functions*
- *S3: Storing and managing data*
- *RDS: Setting up and managing PostgreSQL databases for our APIs*
- *EC2: Hosting and load balancing APIs*
- *ECS: Deploying containerized applications*
- *IAM and Secrets Manager: Managing roles, policies and secrets to ensure secure access to AWS services across different environments*
- *CloudWatch: Monitoring and logging other services*

Dec 2020 – Aug 2023

Test Process Specialist

Robert Bosch Energy and Body Systems, Miskolc, Hungary

- **Digitalization**

- Extract and transform data from manufacturing equipment
- Developing Python applications to automate daily engineering duties
- Creating KPI dashboards with PowerBI for engineering team

- **Engineering tasks**

Sep 2019 – Dec 2020

Electronic Development Engineer

Ten Pao Electronics, Miskolc, Hungary

- **Digitalization**

- Extracting and visualizing production data for daily meetings
- Creating dashboards on ad-hoc requests
- Writing Excel VBA Macros to collect previous day's manufacturing data

- **Engineering tasks**

Apr 2017 – Sep 2019

Internship in Manufacturing

Robert Bosch Energy and Body Systems, Miskolc, Hungary

Education

Sep 2023 –

MSc in Software Design

IT University of Copenhagen, Copenhagen, Denmark

Expected graduation: 2025 Summer

Sep 2014 – Jan 2020

BSc in Electrical Engineering

University of Miskolc, Miskolc, Hungary

- *Specialization: Electronic Design and Manufacturing*
- *Thesis: Hardware design of an electronic cigarette*

Personal Skills

Language:

English (C1, IELTS 8 band), Hungarian (Native)

Programming:

Python, JavaScript, Go, TypeScript, Java

Web Frameworks:

ExpressJS, ReactTS, FastAPI, Flask, Django

Technologies:

Amazon Web Services, Docker, Vagrant, Bash, Git, GitHub Actions, Bitbucket Pipelines, Prometheus, Grafana, Relational Databases, Pytest

Personality:

- Chatterbox
- Sociable
- Innovative
- Enthusiastic
