Profile

I am an **authentic** and **quick-witted Software Developer** with a background as an **Electrical Engineer**. I write my code in a **clean, testable** and **maintainable** way, with a keen **attention to detail**, and a dedication to quality. I am experienced in **problem solving within high pressure environments** and have the ability to **swiftly make well-informed, rational decisions**. I am **persistent** yet **reasonable**, and I work well both in a team and by myself.

Work Experience

Oct 2024 –

Full Stack Student Developer

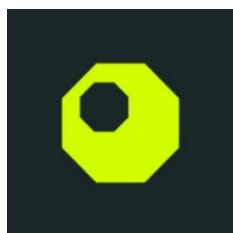

IT University of Copenhagen, Copenhagen, Denmark

- **Full Stack Development**
 - *Developing React JS Frontend*
 - *Building and managing Express JS + SQLite backend*
 - *Taking over legacy codebase*
 - *Maintaining and expanding application*
- **DevOps**
 - *Creating and managing CI/CD pipelines for deployment*
 - *Setting up deployment environments*
 - *Containerizing and deploying application on ITU-managed servers*
 - *Configuring NGINX reverse proxy and SSL certificates for environments*

Nov 2023 – Oct 2024

Full Stack Developer & Quality Assurance Student Assistant

Oktogrid, Copenhagen, Denmark

- **Full Stack Development**
 - *Developing, testing, and maintaining RESTful APIs using Python FastAPI*
 - *Creating data visualization dashboards with React TS*
 - *Developing, testing, and maintaining Python-based CLI applications*
- **DevOps (Amazon Web Services)**
 - *Deploying applications with CDK*
 - *Creating CI/CD pipelines via Bitbucket for automated deployment*
 - *Developing and managing Lambda functions*
 - *Managing IoT Core rules for MQTT messages to trigger Lambda functions*
 - *Storing and managing data on S3*
 - *Setting up and managing PostgreSQL databases on RDS*
 - *Hosting and load balancing APIs on EC2*
 - *Deploying containerized applications on ECS*
 - *Managing roles, policies and secrets on IAM*
 - *Monitoring and logging other services with CloudWatch*

Sep 2019 – Aug 2023

Test Process Specialist

Robert Bosch Energy and Body Systems, Miskolc, Hungary

- **Digitalization**

- *Extract and transform data from manufacturing equipment*
- *Developing Python applications to automate daily engineering duties*
- *Creating KPI dashboards with PowerBI for engineering team*

- **Engineering tasks**

Apr 2017 – Sep 2019

Internship in Manufacturing

Robert Bosch Energy and Body Systems, Miskolc, Hungary

- *Extracting and visualizing production data for daily meetings*
- *Creating dashboards on ad-hoc requests*
- *Writing Excel VBA Macros to collect previous day's manufacturing data*
- *Debugging malfunctioning test equipment*
- *Building and validating new test instruments*
- *Creating and revising documents for manufacturing*

Education

Sep 2023 – Jun 2025

MSc in Software Design

IT University of Copenhagen, Copenhagen, Denmark

- *Specialization: Software Development*
- *Thesis: Evaluating User Capacity of N-Tier Web Services via Latency and Throughput Analysis*

Expected date of graduation: 2025 June

Sep 2016 – Jan 2020

BSc in Electrical Engineering

University of Miskolc, Miskolc, Hungary

- *Specialization: Electronic Design and Manufacturing*
- *Thesis: Hardware design of an electronic cigarette*

Personal Skills

Language:

English (C1, IELTS 8 band), Hungarian (Native)

Programming:

Python, JavaScript, Go, TypeScript, Java

Web Frameworks:

ExpressJS, ReactTS, FastAPI, Flask, Django

Technologies:

Amazon Web Services, Docker, Vagrant, Bash, Git, GitHub Actions, Bitbucket Pipelines, Prometheus, Grafana, Relational Databases, Pytest

Personality:

- Chatterbox
- Sociable
- Innovative
- Enthusiastic
